## **DETAILED ACTION**

### ***Claim Objections***

Claim 3 is objected to because of the following informalities: In claim 3, line 2, applicant claims, "said half circle element" which fails to contain proper antecedent basis (claim 3 depends from claim 1 but "a half circle element" is not mentioned until claim 2). Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Page '425. Page discloses an excavating lip assembly (figures 1-5) including a lip (generally 18), the lip having a surface (as seen in figures 1 and 2), a holding element (rectangular bar, 16) in the lip surface, the holding element having an opening 27 therethrough, a wear member (generally 10) placed over the lip surface and secured via

Art Unit: 3671

a bolt and nut (26,26a) whereby the bolt has one end (as seen in figure 2) that is received in an indentation of the wear member (at 12) and the other in the holding element opening and secured by the nut (as seen in figures 1 and 2). Also, Page shows the wear member having atop and bottom flanges (as seen in figure 2) with a notch/cutout in the top flange.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Page '425. Page discloses the claimed device substantially as discussed above but fails to show the use of a U-bolt. However, the use of such bolt is an obvious art recognized equivalent of that as disclosed by Page and the use of either connecting means would be an obvious matter of choice of design, absent any showing to the contrary.
